

Acorn Systems
Acorn OnDemand™

Software as a Service

Software as a Service (SaaS) is rapidly gaining traction in enterprises of all sizes by overcoming many traditional hurdles of on-premise enterprise software. SaaS eliminates the obstacles such as long infrastructure deployment cycles, large upfront costs, lack of platform expertise and many others by offering a best-of-breed deployment scenario at an affordable price. All you need is a browser and an internet connection, leave the rest to us.

Lower Up Front Costs

Preserving and improving cash flow has never been more critical than now. Acorn OnDemand frees up capital so you can invest in competitive growth strategies while improving your bottom line with actionable results. Both of these improve cash flow and overall value to your company.

Faster Time to Value

No other solution provides a faster ROI than ours. Acorn OnDemand makes it even easier to 'pay as you go' by realizing the value of our insight as you leverage your enterprise. There is no need to wait for IT to free up resources to deploy application servers and infrastructure. Get started now and begin your journey to better profits and improved visibility.

Right Sized for Your Needs

Acorn OnDemand makes it easy to pay for what you use, so it is easier to get started and easier to keep going.

Reliability in a Neat Package

Acorn has always prided itself on providing customers responsive and reliable customer support. Our customers really appreciate our proactive approach to helping them ensure the availability of our market leading solutions. Acorn OnDemand takes this commitment to the next level by having Acorn oversight to ensure ultimate reliability. Acorn has partnered with Rackspace Hosting to offer maximum reliability at a price you can afford.

Greater Flexibility

It is hard to predict the future, yet that is exactly what many business owners have to do when requesting application support from their IT organization. Acorn OnDemand removes the hassle of the usual three to five year planning exercises by offering flexible options that can change with your business needs.

Highly Scalable

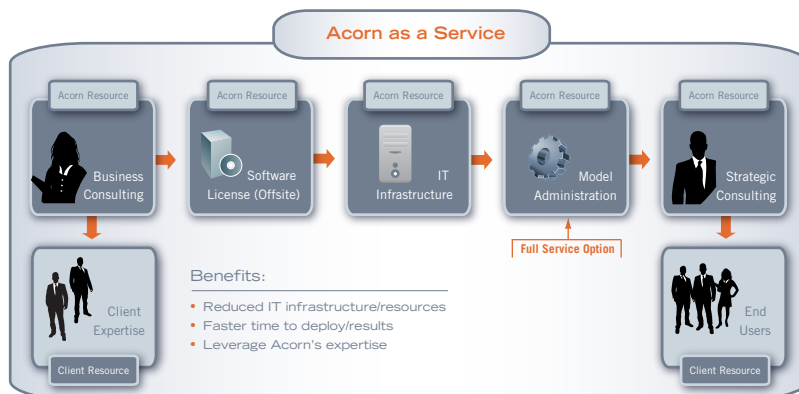

Acorn has made a name for itself by scaling solutions to new heights never even thought possible. Acorn OnDemand can scale to whatever your business needs require.

Best Practices Expertise

Acorn has long provided its clients with best practices expertise that has allowed them to realize incredible opportunities in the area of growth and improved profitability. Now with Acorn OnDemand, you can tap into our best practices expertise in business intelligence solutions. Acorn OnDemand is your IT partner.

Complexity Simplified

Acorn has established itself as a market leading innovator in Corporate Performance Management (CPM) solutions. We take great pride in harnessing the power of the Microsoft Business Intelligence platforms to your advantage. Now we have simplified the deployment of our solutions. Acorn OnDemand makes it easy to say yes to the game changing insight brought to you by our performance management solutions.

Easy Access to Upgrades

Renewed emphasis on cost reduction has strained IT resources to the breaking point. As a result, many companies are forced to use outdated versions of software because there is no bandwidth to upgrade. Nothing is more frustrating for business users than knowing their vendor has responded to their needs and they are unable to take advantage of those features. Acorn OnDemand ensures you are always using the most advanced solutions on the market today. If you add computer-based training from Acorn University, your team will always be up to speed on the features and best practices that will give you the edge over the competition.

Secure

There is no need to worry about unauthorized access to sensitive data. Acorn OnDemand features secure data centers to protect your valuable assets from harm.
