Acorn Power Components for Excel™

Model Maintenance and Reporting Utility

Product Overview:

Acorn Power Components for Excel (APC) empowers end-users to leverage Microsoft Excel functionality and familiarity for model maintenance and reporting. These capabilities leverage enhanced Excel 2007 and 2010 functionality, allowing the user to use the new features and functions such as charting and equations.

Three Components:

There are three different Power Components that utilize the Microsoft Excel interface.

- *Power Modeler for Excel* – Use the Excel interface to easily build and maintain model structure and components
- *Data Connector for Excel* – Retrieve, update, and input time period data in bulk
- *Power Reporting for Excel* – Retrieve calculated model results in Excel Spreadsheet format, then utilize Excel functions to report the output
