Acorn Data Connector

Acorn Power Reporting

Technical Specifications & Application Features

Technical Specifications:

- Requires Microsoft Excel 2007
- Deployed via Microsoft click-once to install technology
- Executed as a client installed Microsoft Excel Plug-in
- Acorn Power Modeler supports Acorn EPS 4.2.x and later
- Acorn Data Connector / Acorn Power Reporting supports Acorn EPS 4.1.x and later

Application Features:

- Enables end-user to leverage Microsoft Excel functionality and familiarity
- Interact with model data and results both on-line and off-line from Acorn EPS server applications
- Perform bulk load and edits to new and existing financial and operational data
- Leverage Excel 2007 functions, charting and equations
- Highly flexible reporting options available via Acorn reporting templates, Excel reporting functionality and end user defined reporting
- Publish Acorn Power Reporting results to SharePoint dashboards (requires MS SharePoint 2007 Enterprise)
